SUEZ Marks a Milestone at the Atlantic LNG Facility in Trinidad

HOUSTON, November 14, 2006 -- SUEZ LNG NA LLC today announced that its liquefied natural gas (LNG) ship, *SUEZ MATTHEW*, had the honor of loading the 1000th cargo of LNG from the Atlantic LNG facility in Trinidad. This event marked the ship's 174th loading at Atlantic LNG, representing a total of 17.4% of all LNG loadings there and the most of any single vessel calling on this critical LNG export facility. The *SUEZ MATTHEW* also loaded the very first cargo at Atlantic LNG more than seven years ago in April 1999.

SUEZ MATTHEW has become a critical means by which the New England region receives its natural gas. The ship, one of several in the SUEZ fleet, makes regular deliveries directly from Trinidad to SUEZ LNG NA's import facility in Everett, Massachusetts. The Everett Terminal, which is the first LNG import facility ever built in the United States, currently serves approximately 20 percent of the region's natural gas demand for home heating, industrial use, and electricity production. Thus far in 2006, the Everett Terminal has received more LNG shipments than any other U.S. LNG import terminal, and this particular cargo on *SUEZ MATTHEW*, which arrived in Everett on October 18, 2006, is the 734th cargo delivered to the terminal since its start-up in 1971.

"We are pleased to be making history again, as we were the first LNG import facility in the United States and SUEZ MATTHEW was both the first and the 1000th ship to load at Atlantic LNG," said Clay Harris, president and CEO of SUEZ LNG NA. *"The SUEZ MATTHEW and other vessels in our fleet play a significant role in ensuring supply reliability for our customers throughout the year."*

With demand for environmentally sound natural gas on the rise throughout the United States and especially in New England, LNG has become an increasingly important part of the energy supply mix. For that reason, Neptune LNG LLC, a SUEZ LNG NA affiliate, is seeking approvals to build and operate an offshore deepwater LNG port that would serve the growing New England market. *"We are drawing on our global experience in the LNG sector as well as our intimate knowledge of the New England marketplace to develop the Neptune deepwater port, an important new source of natural gas that will be available to customers as early as 2009,"* said Zin Smati, president and CEO of SUEZ Energy North America.

The Neptune deepwater port will be located approximately 10 miles off the coast of Massachusetts and will provide an average of 400 million cubic feet of natural gas per day –

enough to serve 1.5 million homes daily. During periods of peak demand, Neptune will be capable of increasing its delivery rate to 750 million cubic feet per day.

Beyond New England, another SUEZ affiliate, Calypso LNG, LLC, is also developing a deepwater LNG port that will address Florida's growing demand for natural gas. The Calypso project is proposed to be located approximately 10 miles off the southeast coast of Florida. Natural gas deliveries from this project could commence as early as 2010.

About the Company:

Based in Houston, SUEZ Energy North America, Inc. is the business unit of SUEZ Energy International responsible for managing SUEZ's positions within the energy value chain in the U.S., Mexico and Canada, including electricity generation and cogeneration, natural gas and liquefied natural gas (LNG), asset-based trading and origination, and retail energy sales and related services to commercial and industrial customers.

SUEZ Energy North America owns and/or operates a total of 45 power, cogeneration, steam, and chilled-water facilities, including those in construction or development, representing a capacity of more than 5,538 MW of electricity generation, 6.4 million pounds per hour of steam, and 61,749 tons per hour of chilled water. SUEZ Energy North America's wholly owned subsidiary, Distrigas of Massachusetts, owns and operates a liquefied natural gas receiving terminal in Everett, Mass., which began operations in 1971 and currently serves most of the gas utilities in New England and key power producers, meeting approximately 20 percent of New England's annual gas demand.

SUEZ Energy International is a business line of SUEZ (NYSE: SZE), which is an international industrial and services Group that employs 157,650 people worldwide and achieved revenues of 41.5 billion euros or \$49.9 billion in 2005.
